📄 Profile

Aspiring Full-Stack Developer with a strong foundation in the MERN stack and a passion for building efficient and scalable web applications. Proficient in developing RESTful APIs with Node.js/Express.js and creating dynamic, responsive user interfaces with React.js. A quick and adaptable learner with hands-on experience across the entire development lifecycle, eager to contribute to innovative projects and grow within a collaborative team environment.

🎓 Education

B.Tech CSE

ABES Institute of Technology

09/2026 | Ghaziabad, UP

Class XII

KDB Public School

2022 | Ghaziabad, UP

Class X

St. Mary's Convent School

2020 | Ghaziabad, UP

🧩 Hackathons

Smart India Hackathon (SIH) - Participant

Ghaziabad, UP

- Collaborated in a team to conceptualize and design a portal (website and app) for emergency SOS transmission in low-connectivity areas.
- The proposed solution aimed to connect victims with the nearest government response agencies (like NDRF) by transmitting location data and providing survival tips.

📜 Certificates

- Certified Entry-Level Python Programmer (PCEP™) – Python Institute
- Mastering Test Automation with Playwright and TypeScript – CodeSignal
- Oracle Certified Foundations Associate, Java – Oracle
- Introduction to Linux (LFS101 Digital Badge) – The Linux Foundation
- JENKINS Beginner – Udemy
- MongoDB-in-termediate.
- Ai and ml-beginner

🧠 Technical Skills

Operating Systems: Linux, Windows

Languages: JavaScript, Python, Java, C, Go

Test Automation Frameworks: Selenium WebDriver, Playwright, Cypress, TestNG

API Testing Tools: Postman, REST Assured, Thunderclient

CI/CD & DevOps: Jenkins, Git, GitHub, Azure

AI Tools: Experience with Generative AI- gemini, gpt, claude for code generation, context tools like memplace to boost productivity.

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Context API, Bootstrap, ShadCN

Backend: Node.js, Express.js, Go, RESTful APIs

Databases: MongoDB, MySQL, SQLite3, Firebase

🧘 Soft Skills

- Perfectionist (Attention to Detail)
- Patience & Persistence
- Collaboration & Teamwork
- Adaptability & Flexibility

📁 Projects

E-commerce Website End-to-end

Designed and developed an ecommerce website which is fully functional end-to-end. With an Admin Panel which has all the required utilities, making dynamic data handling possible.

<https://e-commerce-qs8m.vercel.app/> 🌐

AI-Powered FIR Classification System | Python, PyTorch

Implemented a deep learning model to automatically classify First Information Reports (FIRs) into the correct Indian Penal Code (IPC) sections based on the text. • Utilized PyTorch to build and train the Natural Language Processing (NLP) model, focusing on text analysis and classification. • Was responsible for the complete model training pipeline, including iteratively tweaking hyperparameters to enhance classification accuracy.

HTTPS Server Implementation | C

Implemented a https server in with proxy cache feature.

Command-Line Interface (CLI) Parser | C

Built a versatile CLI tool in C capable of parsing command-line arguments and inputs. This program serves as a foundational component for creating more complex command-line applications by dissecting and handling input data.
